INDICATED PRODUCTION OF SPRING WHEAT AS OF JULY 15, 1941 FOR 4 STATES
BY CROP REPORTING DISTRICTS, WITH COMPARISONS.

The Crop Reporting Board of the United States Department of Agriculture has prepared the following mid-month report on probable production of spring wheat in the 3 States, Minnesota, North Dakota, and South Dakota, and all wheat in Montana, to supply information that can be used in facilitating the orderly movement of the crop.

The production of all spring wheat in the 4 States is estimated as of July 15 at 228,843,000 bushels, compared with the July 1 estimated production of 206,767,000 bushels. Continuation through the first half of July of unusually favorable moisture and temperature conditions have resulted in the addition of 22 million bushels to the July 1 estimate of production in these 4 States. Their 1940 spring wheat crop was 187,186,000 bushels and the 10-year (1930-39) average is 127,469,000 bushels.

Improvement in the prospects during the first half of July was most pronounced in North Dakota, and in South Dakota, excepting in the East Central District.

Indicated production of winter wheat in Montana also is above that indicated on July 1 by about 1-1/3 million bushels, from 25,688,000 bushels on July 1 to 27,040,000 bushels on July 15.

Estimates by crop reporting districts are shown in the table on the opposite side.

ALL SPRING WHEAT

| State | Production | | | |
|---------------|------------|------------|--------------|---------------|
| | Average | | Indicated | |
| | 1930-39 | 1940 | July 1, 1941 | July 15, 1941 |
| | Thous. bu. | Thous. bu. | Thous. bu. | Thous. bu. |
| Minnesota | 19,565 | 28,061 | 20,710 | 20,750 |
| North Dakota | 63,739 | 97,054 | 119,101 | 134,754 |
| South Dakota | 19,682 | 25,121 | 31,634 | 36,799 |
| Montana 1/ | 35,273 | 56,070 | 61,010 | 63,580 |
| 4 States | 138,259 | 206,306 | 232,455 | 255,883 |
| United States | 178,090 | 227,547 | 241,292 | |

1/ All wheat.
